

HOSEA URBANUS AUDU

Software Engineer | Full-Stack Developer | Data Analyst | Technical Researcher

Billiri, Gombe State, Nigeria | +234 903 003 1278 | hoseaurbanusaudu1@gmail.com

Portfolio: [hosea-u-audu.vercel.app](#) | GitHub: [github.com/Hoseaurbanus](#)

PROFESSIONAL PROFILE

Results-driven Software Engineer, Data Analyst, and Technical Researcher with a B.Sc. in Physics from Gombe State University, graduating as the Best Graduating Physics Student. Combines full-stack software engineering expertise in React, TypeScript, PHP, MySQL, Tailwind CSS, with rigorous research and data-analytics experience using ODK, KoboToolbox, SurveyCTO, SPSS, Excel, and Power BI, enabling the design of scalable digital solutions alongside evidence-based analytical support.

Has collaborated with researchers from Gombe State University, Adamawa State University, Usmanu Danfodiyo University Sokoto (UDUS), and Federal University Kashere, contributing to high-quality research outputs through rigorous data management and analytical support.

CORE COMPETENCIES & TECHNICAL SKILLS

SOFTWARE ENGINEERING	DATA ANALYSIS	RESEARCH
- React, TypeScript, JavaScript, Tailwind CSS - PHP, MySQL, REST APIs - SaaS & database design, RBAC - Git, GitHub, Vercel	- Statistical analysis (SPSS, Python, SQL) - Data cleaning & validation - Dashboards (Power BI, Excel) - Survey & research reporting	- Quantitative research design - Electronic data collection (ODK, KoboToolbox, SurveyCTO) - Monitoring & evaluation support - Technical documentation

SELECTED ACHIEVEMENTS

- Best Graduating Physics Student — Gombe State University
- Designed and developed the **SMUG Flex Multi-School Management SaaS Platform**, serving multiple schools from a single scalable platform
- Developed the complete **Graceland Royal Academy School Management System**, covering academics, examinations, fees, and communication
- Supported multidisciplinary academic research at four Nigerian universities through advanced data analysis and quality assurance

PROFESSIONAL EXPERIENCE

Data Analyst Manager & Quality Assurance Specialist

2024 – Present

Freelance / Research Consultant

Support multidisciplinary research projects for universities, research institutions, and independent researchers by providing data management, quality assurance, and statistical analysis services across Gombe State University, Adamawa State University, UDUS, and Federal University Kashere.

KEY RESPONSIBILITIES

- Coordinate research data collection activities from project planning to final reporting
- Design and manage electronic data collection workflows using ODK Collect, KoboToolbox, and SurveyCTO
- Perform data cleaning, validation, transformation, and quality assurance to ensure data integrity
- Conduct descriptive and inferential statistical analysis using Python, SQL, SPSS, Excel, and Power BI
- Develop dashboards, charts, and visual reports for research findings; train enumerators on digital tools

KEY ACHIEVEMENTS

- Successfully supported multiple academic and institutional research projects
- Improved research data quality through standardized validation and quality-assurance procedures
- Produced analytical reports that informed research findings and publications

Full-Stack Software Developer

2024 – Present

Freelance

Design, develop, deploy, and maintain modern web applications with a focus on scalable architecture, responsive interfaces, and intuitive user experiences.

KEY RESPONSIBILITIES

- Design responsive user interfaces using React, TypeScript, Tailwind CSS, HTML5, and CSS3
- Develop backend functionality using PHP and MySQL; design and optimize relational databases
- Build secure authentication and role-based access systems; develop RESTful APIs
- Deploy applications via Vercel; manage source code using Git and GitHub

KEY ACHIEVEMENTS

- Designed and developed the SMUG Flex Multi-School Management SaaS Platform
- Developed the Graceland Royal Academy School Management System
- Delivered modern, accessible user interfaces optimized across desktop, tablet, and mobile devices

KEY RESPONSIBILITIES

- Provide calendar/email management, internet research, report writing, data entry, and administrative workflow support across multiple client projects

Mathematics Teacher

2024

Nassara Baptist School, Sokoto State

KEY RESPONSIBILITIES

- Taught Mathematics to secondary school students, preparing curriculum-aligned lesson plans and assessments

Mathematics Teacher

2022 – 2023

United Nations Academy, Billiri, Gombe State

KEY RESPONSIBILITIES

- Delivered Mathematics lessons to junior and senior secondary students, integrating practical learning approaches

Computer Instructor

2012

Dynamic Computer Centre / Smug Computer Centre

KEY RESPONSIBILITIES

- Taught computer fundamentals, digital literacy, and Microsoft Office applications to beginners

FEATURED SOFTWARE ENGINEERING PROJECTS

SMUG Flex — Multi-School Management SaaS Platform

Founder | Full-Stack Software Developer | smug-flex-multi-school-03to.vercel.app/

A cloud-based, multi-school management SaaS designed to help multiple primary and secondary schools manage academic, administrative, financial, and communication processes from a single scalable platform, supporting independent school environments through role-based access control.

KEY FEATURES

Multi-school architecture • Role-based dashboards (Super Admin, School Admin, Teacher, Accountant, Parent) • Examination & report-card automation • Attendance & fee management • Responsive mobile-first interface

Technologies: React, TypeScript, Tailwind CSS, PHP, MySQL, REST APIs, Vercel

Graceland Royal Academy — School Management System

Full-Stack Software Developer | gracelandroyalacademy.com.ng/

A complete school management system digitizing academic administration, examination management, student records, fee management, and communication between administrators, teachers, accountants, and parents.

KEY FEATURES

Student registration & parent portal • Teacher and accountant dashboards • Examination management & result computation • Attendance and subject/class management

Technologies: React, PHP, MySQL, Tailwind CSS, HTML5, CSS3, REST API

Personal Portfolio Website

Designer & Developer | hosea-u-audu.vercel.app/

A modern personal portfolio showcasing software engineering projects, research experience, technical expertise, and professional achievements.

Technologies: React, TypeScript, Tailwind CSS, Vercel

RESEARCH EXPERIENCE

Research Data Analyst & Quality Assurance Specialist2024 – Present
Freelance Research Consultant

Provides research support, quality assurance, statistical analysis, and electronic data collection services for academic institutions, research organizations, and independent researchers across Nigeria, spanning education, public health, agriculture, environmental science, physics, social sciences, and technology from proposal development through data collection, analysis, interpretation, and reporting.

CORE RESPONSIBILITIES

- Design and digitize research questionnaires with validation rules and skip logic
- Train enumerators and research assistants on digital data collection tools; coordinate field activities
- Perform data cleaning, validation, and preprocessing; conduct descriptive and inferential statistical analysis
- Generate charts, dashboards, and visual reports; prepare technical reports and analytical summaries
- Maintain research data quality throughout project lifecycles and support interpretation of findings

RESEARCH INSTITUTIONS SUPPORTED

Gombe State University • Adamawa State University • Usmanu Danfodiyo University, Sokoto (UDUS) • Federal University Kashere • Independent academic researchers

Selected Research Projects

Assessment of Radioactivity Concentration in Staple Foods in Gombe State, Nigeria
Gombe State University | Principal Researcher — B.Sc. (Physics) Final Year Research

Conducted an experimental investigation into the concentration of naturally occurring radionuclides in commonly consumed staple foods, covering research design, sample collection, laboratory analysis, statistical interpretation, and radiation dose assessment.

Climate Change and Human Migration in Sokoto State, Nigeria
Research Data Analyst

Led questionnaire review, data cleaning, statistical analysis, quality assurance, and research reporting.

Children's Online Privacy and Safety in Nigeria
Enumerator / Research Data Collection Specialist

Conducted electronic data collection, household survey administration, GPS-enabled data capture, and validation of survey records.

Other research contributions: Impact of AI Chatbots on Physics Education (Research Analyst) · Prevalence of Bovine Tuberculosis (Research Data Analyst) · Comparative Study of Fish Feed (Research Support) · Black Consciousness Research (Research Support) · Space Weather and Communication Systems (Scientific Research Support) — data analysis, quality assurance, and technical documentation.

EDUCATION

Bachelor of Science (B.Sc.) in Physics
Gombe State University, Gombe State, Nigeria

- Graduated as the **Best Graduating Physics Student**
- Final-year research: Assessment of Radioactivity Concentration in Staple Foods in Gombe State, Nigeria

ADDITIONAL INFORMATION

- **Languages:** English (fluent), Hausa (fluent), Tangale (fluent)
- **Availability:** Open to full-time, contract, and remote software engineering, data analysis, or research-support roles
